Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Group I: Claims 1-74 and 77-92, drawn to a method for requesting an object being initiated by a behavior of a user viewing the window, creating an overlay plane, and overlaying the created overlay plane with the window, classified in class 345, subclass 790.
 - II. Group II: Claims 75-76, drawn to a method for creating an overlay plane including the object, overlaying the created overlay plane with the window, displaying the window overlaid with the created overlay plane, receiving a request being initiated by a behavior of a user viewing the window, and displaying the window without the overlay plane as a function of step receiving the request, classified in class 345, subclass 788.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separated usable. In the instant case, invention I has separate utility such as of overlap control for requesting an object being initiated by a behavior of a user viewing the window, creating an overlay plane, and overlaying the created overlay plane with the window as per invention II.

Invention II's, on the other hand, drawn to a method of layout modification of creating an overlay plane including the object, overlaying the created overlay plane with the window, displaying the window overlaid with the created overlay plane, receiving a request being initiated by a behavior of a user viewing the window, and displaying the window without the overlay plane. See MPEP & 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these invention are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. Applicants are advised that the response to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed.
